A CRM APPLICATION FOR THECHAISHOP&CO

1. INTRODUCTION

ProjectOverview :

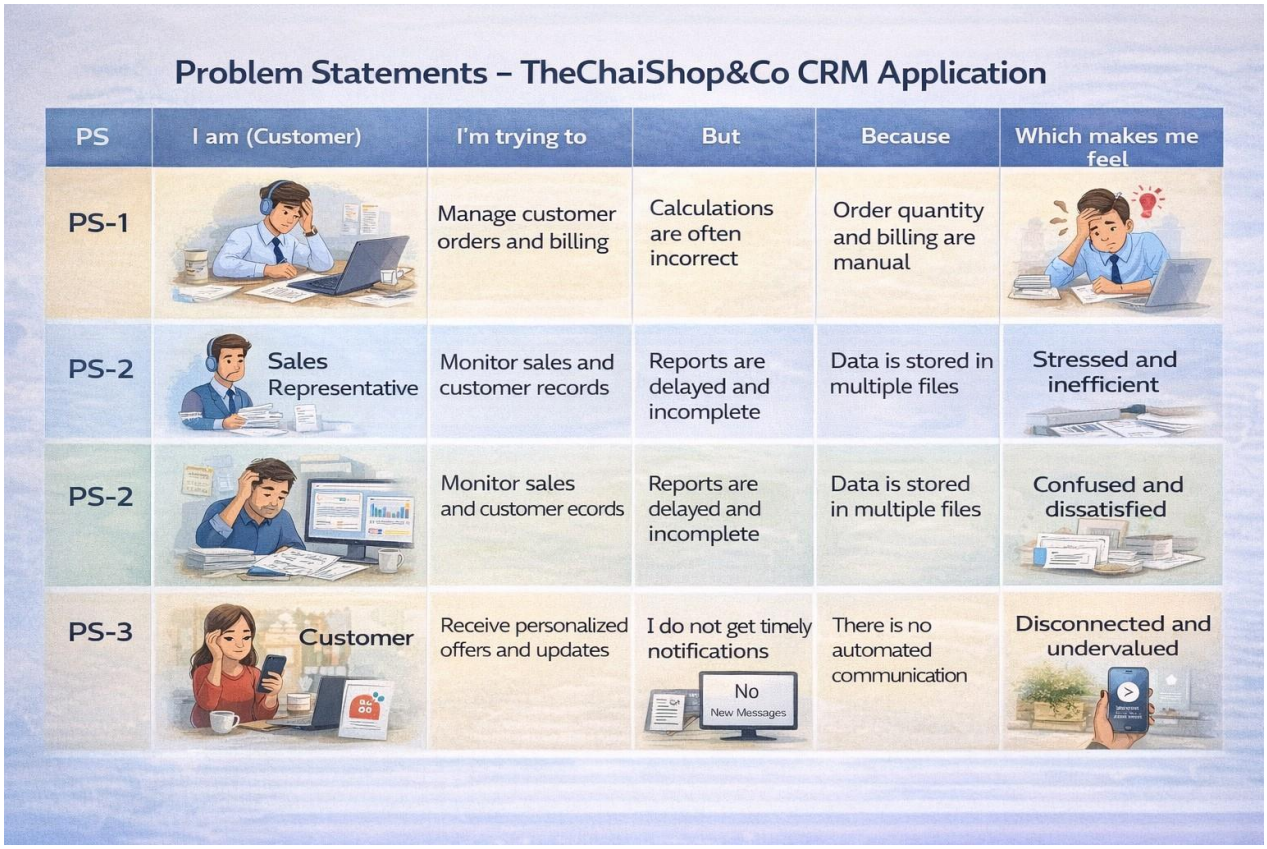
The project "A CRM Application for TheChaiShop&Co" focuses on developing a Salesforce-based Customer Relationship Management (CRM) system to manage customer, employer, and enterprise accounts efficiently. The system automates sales processes, maintains customer records, generates reports, and improves customer engagement through automated notifications.

Theprojectuserstoryandobjectivesaredefinedintheinitialsectionofthedocument

Purpose:

The purpose of this project is to:

- Stream line customer relationship management
- Automate billingand order calculations
- Improvedataaccuracy
- Enabledata-drivendecision-making
- Enhancecustomerengagementthroughemailautomation



Problem Statements – TheChaiShop&Co CRM Application

PS	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1		Manage customer orders and billing	Calculations are often incorrect	Order quantity and billing are manual	
PS-2	Sales Representative	Monitor sales and customer records	Reports are delayed and incomplete	Data is stored in multiple files	Stressed and inefficient
PS-2		Monitor sales and customer ecords	Reports are delayed and incomplete	Data is stored in multiple files	Confused and dissatisfied
PS-3	Customer	Receive personalized offers and updates	I do not get timely notifications	There is no automated communication	Disconnected and undervalued

CustomerJourneyMap

JourneyStages:

- Login
- AccessCRMApplication
- EnterCustomerData
- CalculateBills
- ViewReports
- DecisionMaking

Non-FunctionalRequirements

NFR-1: Usability

Thesystemshouldbeeasytouseforsalesrepresentatives,managers,administrators,and analysts without requiring technical training.

Requirements:

- Simpleandintuitiveuserinterface
- Clearnavigationmenus
- Easy-to-understandforms
- User-friendlydashboards

Example:

Anewsalesemployeeshouldbeabletologin,entercustomerdetails,andgenerate orders within a few minutes without help.

SalesforceLightningUIprovidesdrag-and-dropfeaturesandeasynavigation.

NFR-2:Security

Thesystemmustprotectcustomerandbusinessdatafromunauthorizedaccess.

Requirements:

- Role-basedaccesscontrol
- Secureloginauthentication
- Encrypteddatastorage

- Databackupandrecovery

Examples:

- Profilesandpermissionsets
- Object-levelandfield-levelsecurity
- Restrictedbillingaccess
- Secureloginandpasswordpolicies

NFR-3:Reliability

TheCRMsystemshouldworkcorrectlyatalltimesandstoredataaccuratelywithout loss.

Requirements:

- Automaticdatasaving
- Regularsystembackups
- Errorhandlingmechanisms
- Stablecloudenvironment

Example:

Ifauserentersorderdataandtheinternetdisconnects,thesystemshouldsavethe information and restore it later.

Salesforcecloudensuresautomaticbackups.

NFR-4:Performance

Thesystemshouldrespondquicklyandhandlelargeamountsofdataefficiently.

Requirements:

- Fast page loading
- Quick report generation
- Smooth dash board rendering
- Minimal delay

Example: When amanager generates monthly salesreports for hundred of customers, the report should load within 2–3 seconds.

Optimized queries and caching improve speed.

NFR-5:Availability

The system should be accessible when ever required.

Requirements:

- 24/7system availability
- Minimal downtime
- Cloud-based hosting
- Disast error very

Example: Managers should be able to access the CRM system during peak business hours, weekends, or late nights.

Salesforce cloud provides high uptime.

NFR-6:Scalability

The system should support business growth without affecting performance.

Requirements:

- Ability to handle more users
- Support increasing customer data
- Expand ablest or age
- Maintain system speed

Example: If The ChaiShop & Co expands to multiple branches, the CRM system should support thousands of customers without slowing down.
Salesforce infrastructure automatically scales.

Data Flow Diagram

User → Salesforce UI → Custom Objects → Validation Rules → Flows → Reports →Dashboards.

- Generate Orders
- Calculate Bills

- View Reports
- Decision Making

What you'll learn

1. Real Time Salesforce Project

2. Standard and Custom objects
3. Pick list Value sets
4. Types of Fields & their relationships.
5. Page Layouts
6. Record Types
7. Validation Rules
8. Email Templates
9. Flows
10. Reports and Dashboards.

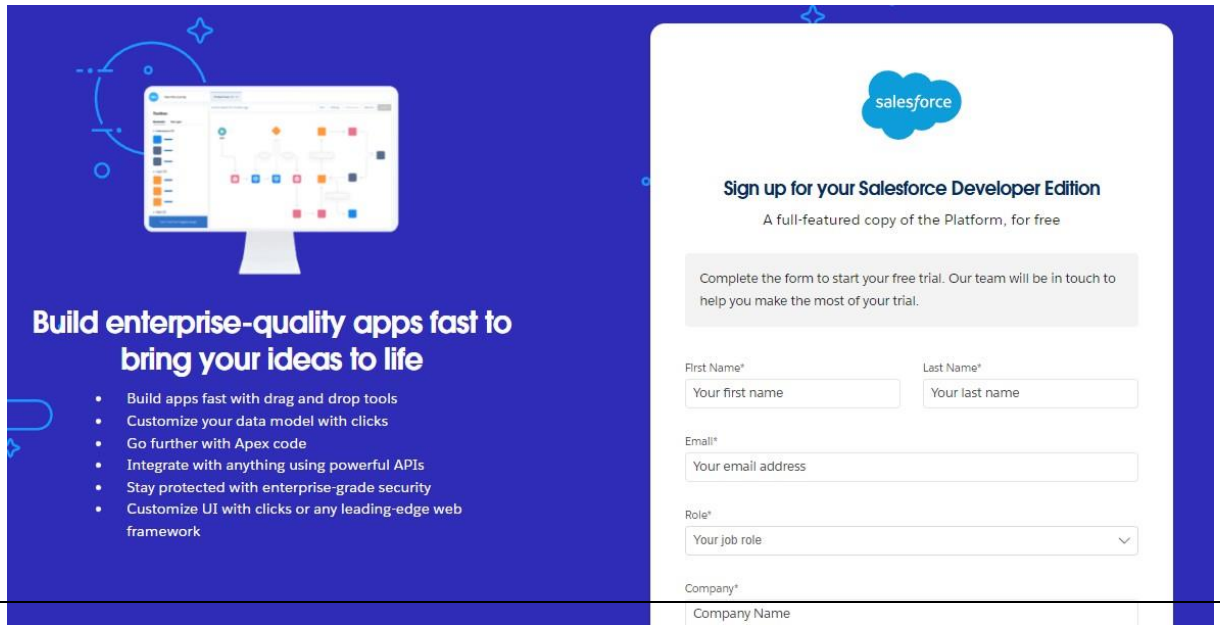
Implementation

Milestone1-

Salesforcedeveloperaccountcreation:Activity 1:

Creating Developer Account:

1. Go to https://developer.salesforce.com/signup
2. On the sign up form, enter the following details :



1) First name & Last name
2) Email
3) Role : Developer
4) Company : College or Company Name
5) County : India

6) Postal Code : pin code
7) Username : should be a combination of your name and company
